

This Sunday November 5th when you change your clocks and smoke detector batteries, don't forget other important devices.

Your Grinder Pump Remote Sentry has (4) coin cell batteries to warn of power failure or pump alarm during a power failure. Remove the front cover and you will see these batteries.

Replace these with (4) four CR2032 coin cell batteries. These may be found at local hardware stores, major retailers or any place that sells watch batteries.

Simply slide the old batteries out and insert the new ones.
