MANDATORY TRAINING EONE GRINDER PUMP INSTALLATION

Attention all contractors that want to work on sewer connections in the City of Warwick.

This post is to inform you of a mandatory training session that you are required to attend if you wish to perform sewer connections requiring a grinder pump within the City Of Warwick.

In order to connect to the sewer system in certain sections of the City, an EONE grinder pump is required as part of the installation. For sewer connections requiring a grinder pump, both a sewer connection permit with the WSA, and an electrical permit with the building department, must be pulled and approved. The installation of the grinder pump must also pass an inspection by FR Mahony in order for the warranty to be activated, and the property owner to be protected.

Due to these requirement, FR Mahony and the Warwick Sewer Authority will be holding a mandatory training session for all contractors that wish to work on sewer connections requiring an EONE grinder pump. A representative from FR Mahony will provide instruction on the proper installation of an EONE grinder pump, the wiring requirements and common issues that are observed during their inspections.

The training will occur on Tuesday March 4th at 9 A.M. at the Warwick Sewer Authority. We will require you to sign in and provide your contractor's license number. Any contractor that does not attend this training session will need to contact the WSA to schedule an alternate time to review the materials. If a contractor does not attend the training session or make alternate arrangements to view the materials, they will not be allowed to work on a sewer connection requiring a grinder pump.

Please let us know if you have any questions or require an alternate time to review the training materials. You may contact us at (401)739-4949 or WarwickSewer@Warwickri.Gov.
